Experience

Workinman Interactive / Game Developer

May 2020 - February 2024, Rochester NY,

- On the primary vendor team for Noggin, winner of two Kidscreen awards
 - Worked closely with artists and animators to create several top played games on the Noggin App
 - Added new core functionality to our proprietary Phaser engine, including a custom Narrator class designed to handle lip flap with automatic silence detection
 - Developed a 3D version of our proprietary Phaser engine using ThreeJs and AmmoJs physics
-

Education

Rochester Institute of Technology / Bachelors of Science, Game Design and Development

August 2017 - May 2021, Rochester NY

Projects

Quiet Thoughts (Freelance Project)/ Steam Game

October 2020 - February 2021

- Independently designed 2D platformer levels
- Participated in playtesting and QA prior to game launch
- Worked closely with developer to ensure the quality of the designs
- Revised designs after feedback rounds

Rubble and Crew: Ruff Ruff Repair

February 2023 - July 2023

- Created in collaboration with Spin Master and Nickelodeon for the Paw Patrol spinoff premier
- Reached 165k plays in first week post launch
- Worked with animator to develop in engine IK controllers to allow part of animated characters to be manipulated by players

Blaze and the Monster Machines: Sports Day

July 2023 - November 2023

- Crafted five unique gameplay experiences with varying mechanics
- Top 5 Most played games on Noggin App
- Developed various systems to work around limitations of Canvas only Phaser development
